

SECTION 7: OPERATION, DIGI II

The Digi II 24 hr (UL# 1601-11-1) control model can be set to stay on longer than 60 minutes. This is for commercial use only where an attendant is present.

Control Setup for Control Model Digi II 60 min (UL # 1601-11):

This setup has 6 different menus.

To escape from this **Setup Menu**, press the **On/Off** button or the device will **automatically exit** the menu in approx. 4 seconds. *← Exit menu*

3 To enter the **Setup Menu** press **PROG/OK** button and hold down for approx. 3 seconds until the following appears in the display:

MENU 1
TIME:12:00

Setting the Clock: Press the up arrow and hold down: The minutes and hours will begin to change. When the hour reads the correct time, release the up arrow key and enter minutes by repeatedly pressing the arrow key for each minute. Press **PROG/OK** to save the time in memory. *Then change Day if needed.*

Next will display:

~~**MENU 2**~~
~~**LANGUAGE: ENGLISH**~~

~~**Setting Language:** Press the up or down arrow key repeatedly until the language you desire appears in the display. Press **PROG/OK** to save the Language in memory.~~
